

Driver wellbeing that protects your fleet and proves it.

DriverWell gives people across transport free, practical wellbeing support. Operators can use the Fleet Wellbeing Suite to organise evidence, practical resources and privacy-safe aggregate engagement information.

FREE

individual support for life

10

minimum cohort for usage reporting

20

minimum cohort for health reporting

BACS

invoice option available

What Fleet Operators Get

- **Aggregate engagement information**

Threshold-protected platform-use reporting. No personal wellbeing activity is shown.

- **Practical resources**

Toolbox Talks, policy resources, learning and support signposting for the whole transport workforce.

- **Clear operator evidence**

A structured way to record practical wellbeing actions without turning DriverWell into surveillance.

- **Simple access**

Browser-based access, with no application deployment or specialist device management required.

Privacy promise to people

- **No individual wellbeing records**

Employers cannot see a person's private mood, fatigue, health, support or RoadMate activity.

- **No location tracking**

DriverWell does not use the Fleet Wellbeing Suite to follow individuals or monitor their movements.

- **Aggregate safeguards**

Usage reporting has a minimum cohort of 10. Higher-risk health reporting is not available.

- **People remain in control**

Individual support is free for life and available independently of an employer.
